Helium Is Too Important

The air-hip is a militery factor. Free since Cerman, denorabled London with sor raids during the Wall war other governments have be a trying to desily so airship inducty of their own to belance the upparent sugar nty of the Cermso

They have full without exception Out of their trial however come one vital new idea-a non-inflammable has the United States centro the will a supply of the gas itelium is the one thing besties money which Cermity needs and deer there to develop a flect of invulnerable flying fork ressus for why -a flect of proceful passenger liners for peace

Germany's auship Irdustry is under gov competationation Adolf Hitter and the Nazi party control the koverment | Nazi policy is shaping toward a climax of war that is known throughout the world. It is the enuse of the current was scare

So it politit be well for Americans to think realistically of these things before setting on their commendable impulse to be beleful to Cetmany by making helium avail able for its alightps. The same beliam which brought a few dozen privileged pas congers to the United States could be used to carry a few hundred bombs to london or Parls some night during a war Hollum is too important under the circumstances to be sold for monty

It's Almost Over

Anticipation is greater than realization -and that's a comfort | for this is corons tion week at list by May 13 It will be over and the world can wink into its rocking chair to start enjoying summer

It isn't tactful to mention it but even here in Ohio the coronation has had a dis turbing effect. The exectiont contienen who try to guess what the public wants to rend may not believe it but coronation stories and pictures have gone flat. The British at this sings of the same probably couldn't understand that in a good many parts of the world people think if a a shime for those two nice young parsons to be crowned at all Most everybody would halber rear about Ldward and Mrs.

This week will bring relief the actual coronation couldn't be built so bad as prop arations for it have been except for tha poor speciators who will strutch their necks and break their arches for hours to see a few min ites worth of pagemetry and they were willing to pay for the privilege

Thuty Years of It

When a man has spent a third of a century as legislator bureaucrat and all ministrator of representative government he should know something about it

In 1908 after a previous unsuccessful at tempt Stanley Buldwin reached the house of commons. His first speech was about coal minera In 1937 as prime minister he has made his last speech preparatory to retirement. NEW YORK STOCK LIST CLOSING QUOTATIONS

Slight Bullish Sentiment Result of Yesterday's Sharp Downturn.

St. By the Associated Press.
NEW YORK May II—A stow-moving stock matcher today historia on to malying ratio and reduced or carolical rariy losses of as much as two or more pouts.
Some traders, while apparently finding hitle stimulation in the general run of news, decladed to take a quick-turn position on the buying ride because of yesterday's sharin price relayer.
